Liftdock - principle:

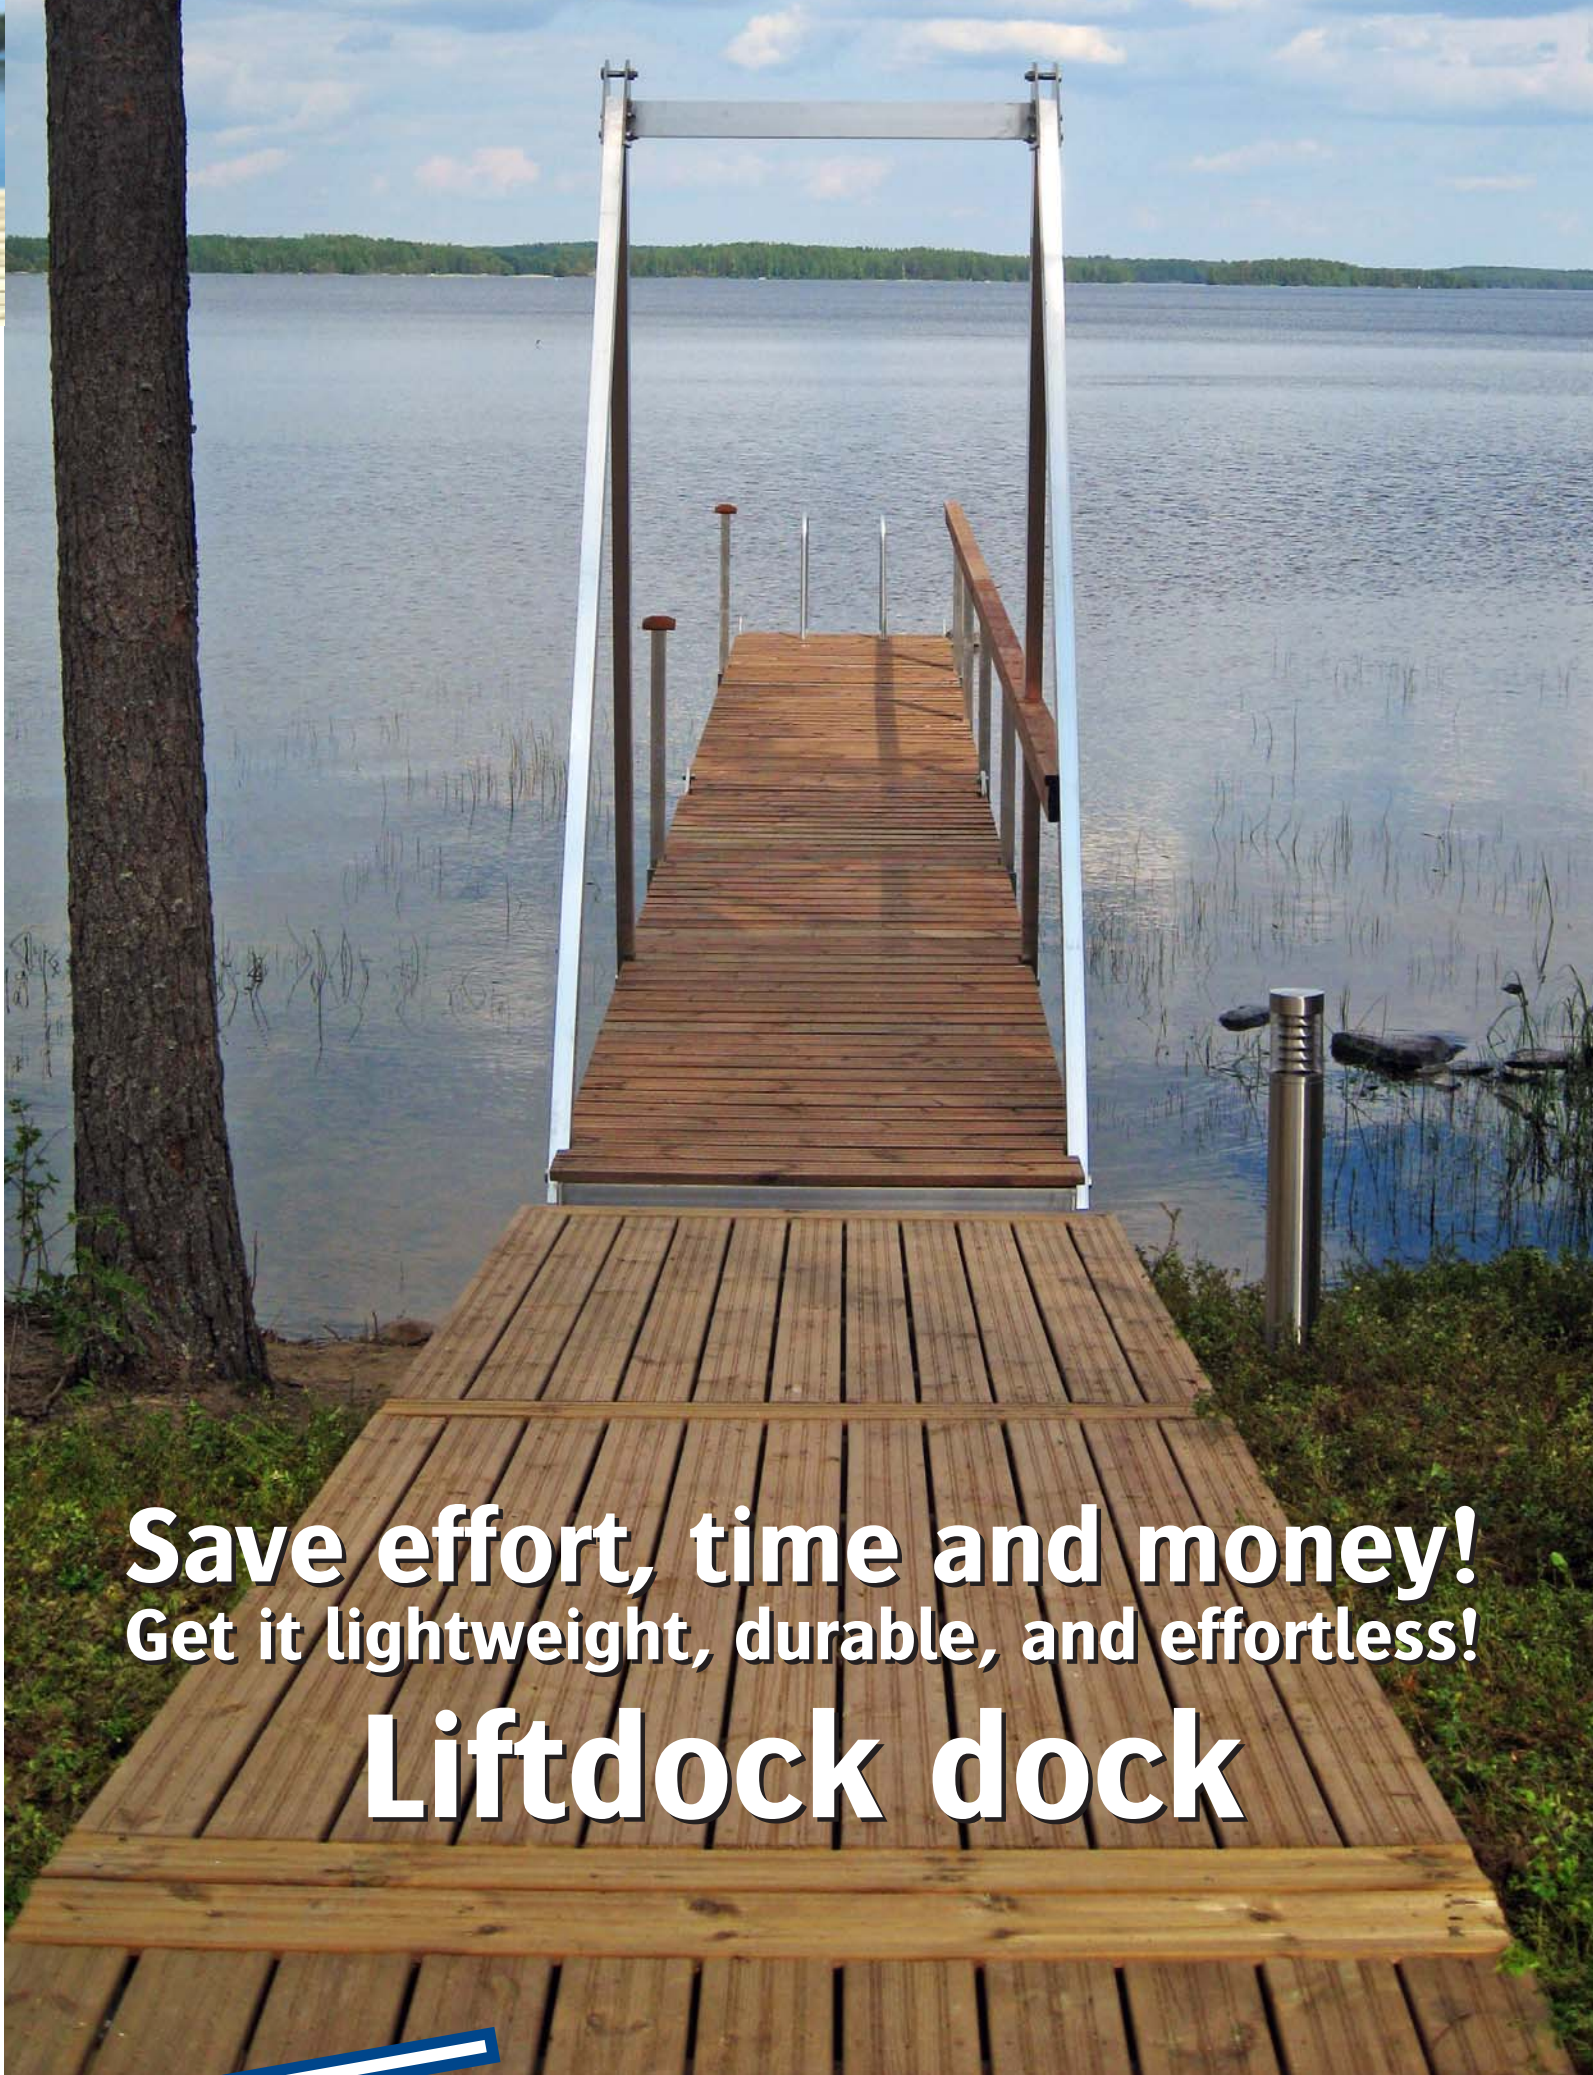

The Liftdock dock is economically most worthwhile!

Comparing the dock installation, operation and maintenance costs during the life cycle of different docks and piers, The Liftdock dock is most worthwhile and beneficial. A Liftdock 's equivalent worth annually is up to five times cheaper than the annual cost of the traditional docks and piers.

You will find the life-cycle comparison statement on our website www.liftdock.fi

Save effort, time and money!
Get it lightweight, durable, and effortless!

Liftdock dock

Easy to use, Liftdock-dock!

Liftdock dock is the most environmentally friendly dock solution

Liftdock - the new, lightweight, and durable aluminum-framed dock is perfectly suitable for drainage basins and watersheds where there are difficult ice conditions and high water level fluctuations. The pier is easy to winch up so the ice can't cause any damage to it. The winch with an automatic brake is lightweight and easy to use. If desired, the electrical winch can also be mounted. The removable, wooden elements can be taken apart and stored for seasonal/winter storage.

The lifting triangle can be removed, if desired, for the summer. Or it can be used for example, as a children's swing or a gymnastics bar. The basic dimensions of the platform are 1.3 x 6.1 m and 1.3 x 7.6 m. The dock can be extended by an additional dock or T-piece and attached to the basic platform. The Liftdock dock is easy to install. The Liftdock package includes a stainless steel mounting balk with screw anchors, plates and a complete winch system. If necessary, we also provide installation service.

A wide range of accessories, e.g

- Electric winch
- T-end piece
- Additional dock articulated to the basic platform
- Swimming stairs
- Dock ladders
- Benches
- Hand rails
- Boat attachments

Facilities

- Easy installation for winter storage or summer season
- Durable, lightweight, and very long-lasting
- The seawater sustainable aluminum frame will last for decades, passing 'from father to son', and the wooden dock elements withstand use and last considerably longer (than other wooden docks) because they can easily be dismantled and stored for the winter months.
- Innovative and patented new product!

The Liftdock frame dock parts are sea water sustainable aluminum. All of the mounting hardware and winch brackets are stainless steel. Wooden dock parts are also available and are fully recyclable, non-toxic Q-Treat pressure treated wood. It is also much lighter and has longer usability than traditional pressure treated wood. As a Liftdock-owner you are also protecting our precious environment!
